

I have just relocated to the above address and receive no service in my local area. I am a Suncom customer and have tried every attempt to receive a signal from any cell tower. I am experiencing "no service" within a 35 to 40 mile radius and still paying for service and was told that I was still subject to the contract. I can use someone else's towers 35 miles away but I was told if I use another tower more than 50% they would cancel my service and still charge a \$200 cancellation fee. What choices do I have?
